

ABSTRACT

5 This invention relates to an apparatus and  
method of construction of the apparatus where the  
apparatus is a portable self-contained structure used for  
cleaning motor vehicles. The apparatus is completely  
self-sufficient with an ability to: carry environmentally  
safe cleaning products; to supply the water needed for  
vehicle washing; and to provide the power needed for  
vehicle washing, vacuuming, and other equipment associated  
10 with the apparatus.
